

AUGUST 29, 2022

TRAFFIC NOTICE FROM DEPARTMENT OF PUBLIC WORKS

**INTERSECTION CLOSURE OF ELMWOOD AVENUE AND ALLEN STREET
WILL BE CLOSED TO ALL VEHICULAR TRAFFIC, STARTING SEPTEMBER 6
DUE TO THE ALLEN STREET CONSTRUCTION PROJECT**

MOTORISTS ARE ASKED TO USE THE FOLLOWING DETOURS:

- Southbound traffic on Elmwood Avenue will detour left onto North Street, right onto Delaware Avenue, right onto Virginia Street, then left onto Elmwood.
- The reverse detour will be in place for northbound traffic – Right off Elmwood Avenue to Virginia Street, left onto Delaware Avenue, and then left onto North Street, and right onto Elmwood.
- Due to weight limits, southbound trucks and other over-size vehicles will be diverted off Elmwood Avenue left onto W. Utica Street, right onto Main Street, and right onto Virginia to reach Elmwood. Northbound trucks will travel the reverse detour.

In addition to standard detour signage, electronic message boards will be in place to alert motorists to the upcoming closure and suggested detours.

The intersection will be closed to vehicular traffic through November to accommodate utility work and construction activity that is part of Phase II of the Allen Street Complete Project. A full intersection closure is necessary as the intersection configuration does not allow for the construction to proceed safely while remaining open to a reduced amount of traffic or partial closure.
